

Rotary Microtome RM-315

- ❖ The rotary microtome is ideal for most routine histology, biological and industrial needs
- ❖ High precision & stability ensures exact reproducible section quality in wax and plastic embedded sections
- ❖ New special and improved blade carrier with non-stick with tissue section in surface
- ❖ High precision specimen feed
- ❖ The band wheel can be locked in any position or highest position
- ❖ Smoothly running hand wheel
- ❖ Spacious integrated section waste tray

Model	RM-315
Section Thickness Range	0-60µm
Horizontal Specimen Stroke	28mm
Vertical Specimen Stroke	60mm
Precision Error	±5%
Maximum Section	50x45mm
Work Area Dimensions	30x57x27cm / 11x22x12 inch
Unit Weight	34kg / 76lb
Cat No.	110V 60HZ 70871100
	220V 50HZ 70872100
